EDUCATION

Joginpally B.R. Engineering College — **Hyderabad, India**
Bachelor of Technology – Computer Science and Engineering — *Aug 2024 – May 2028*

- Relevant Coursework: Data Structures & Algorithms, OOP, Discrete Mathematics, Operating Systems, Computer Networks, DBMS
- CGPA: 7.82 / 10.0 (77.00 / 80.00 credits obtained, through II Year II Semester)

Sri Chaitanya College / Kendriya Vidyalaya No.2, Golconda — **Hyderabad, India**
Class XII – CBSE (Physics, Chemistry, Mathematics) — *Graduated 2024*

ACADEMIC PERFORMANCE (SEMESTER-WISE)

Semester	Period	SGPA	CGPA	Subjects Passed
I Year – I Sem	Jan 2025	7.20	7.20	9
I Year – II Sem	Jul 2025	8.25	7.73	10
II Year – I Sem	Dec 2025	7.78	7.74	9
II Year – II Sem	May 2026	8.05	7.82	10

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript, HTML, CSS, SQL
DSA & Algorithms: BFS, DFS, Flood Fill, Dynamic Programming, Trees, Graphs, Greedy, Sorting
Frameworks & Libraries: React.js, Node.js, NumPy, Pandas, OpenCV
Tools & Platforms: Git, GitHub, Linux/Unix, VS Code, MySQL, Firebase, Google Colab

INTERNSHIP EXPERIENCE

Generative AI Intern – Prodigy InfoTech — **Jul 2026**
Track: GA | Python, PyTorch, HuggingFace Transformers, Diffusers | GitHub

- Completed all 5 assigned tasks: GPT-2 text generation/fine-tuning, Stable Diffusion text-to-image generation, a from-scratch Markov chain text generator, pix2pix conditional GAN for image-to-image translation, and VGG19-based neural style transfer
- Structured each task as an independent, reproducible module with its own README and dependencies, runnable locally in VS Code

Web Development Intern – CodSoft — **Jul 2026**
HTML5, CSS3, JavaScript | GitHub

- Delivered all 3 Level 1 tasks in vanilla HTML/CSS/JS: a personal portfolio site, a product landing page, and an interactive calculator
- Personalized the portfolio task with real project work (FloodMaster, Smart Attendance System, Full-Stack E-Commerce App) and deployed each task as a self-contained, browser-ready module

Data Analytics Intern – CodeAlpha — **Jul 2026**
Python, BeautifulSoup, Pandas, Matplotlib, Seaborn | GitHub

- Built an end-to-end pipeline covering 3 of the internship's 4 tasks: scraping live data from GitHub Trending, exploratory data analysis, and chart-based visualization
- Found that TypeScript and Python account for over half of trending repositories, and that trending stars and forks correlate at 0.97, showing hype (Rust, daily) versus staying power (TypeScript, monthly)

PROJECTS

FloodMaster – BFS Grid Puzzle Game **2025**

JavaScript, HTML5, CSS3 | GitHub

- Engineered a browser-based flood-fill puzzle implementing BFS with 4-directional traversal and visited-set cycle prevention in vanilla JS – no game libraries used
- Built 4 difficulty modes (8x8 to 18x18 grids) with dynamic move limits, 8-color palettes, and real-time progress tracking
- Implemented 4 power-up mechanics: Undo (history stack), Smart Hint (greedy BFS simulation), Color Bomb (frequency analysis), and Corner Fill (multi-origin BFS)
- Designed combo-multiplier scoring system rewarding large fills with escalating bonuses; fully responsive UI with CSS keyframe animations

Smart Attendance System using Face Recognition **2025**

Python, OpenCV, Firebase

- Built real-time facial recognition pipeline achieving 95%+ accuracy, reducing manual attendance effort by 80% across 100+ students
- Integrated Firebase Realtime Database for instant record storage and designed an analytics dashboard with visual attendance trends

Full-Stack E-Commerce Web Application **2025**

React.js, Node.js, MongoDB, REST APIs

- Developed end-to-end platform with JWT auth, product catalog, and order management; built 50+ RESTful API endpoints
- Applied responsive UI/UX principles improving mobile usability scores by 40% based on user testing

ACHIEVEMENTS & CERTIFICATIONS

Competitive Programming & Open Source

- Solved 200+ DSA problems on LeetCode (arrays, trees, graphs, DP); published open-source projects on GitHub applying BFS, greedy, and stack algorithms in production software
- Ranked in the top [X]% in college-level competitive programming contests; Rating [XXX] on Codeforces/CodeChef

Certifications

- Google Foundations of Cybersecurity – Coursera (2025)
- Python for Everybody – University of Michigan, Coursera (2025)
- Data Structures and Algorithms – [Platform] (2024)

LEADERSHIP & EXTRACURRICULAR

Technical Member – Coding Club, JBREC **Hyderabad, India**

Active Contributor *Aug 2024 – Present*

- Co-organised weekly coding challenges and hackathons for 100+ students; mentored juniors on DSA and competitive programming
